

Fortive Corporation
Conflict Minerals Report
For the reporting period from January 1, 2023 to December 31, 2023

This Conflict Minerals Report (the “Report”) of Fortive Corporation (the “Company”) has been prepared pursuant to Rule 13p-1 and Form SD (the “Rule”) promulgated under the Securities Exchange Act of 1934, as amended, for the reporting period January 1, 2023 to December 31, 2023.

The Rule requires disclosure of certain information when a company manufactures or contracts to manufacture products and the minerals specified in the Rule are necessary to the functionality or production of those products. The specified minerals, which we collectively refer to in this Report as the “Conflict Min-1.1 (C)6.3wCt Description of the Company’s Products Covered by this Report

This Report relates to products: (i) for which Conflict Minerals are necessary to the functionality or production of that product; (ii) that were manufactured, or contracted to be manufactured, by the Company; and (iii) for which the manufacture was completed during calendar year 2023. These products, which are referred to in this Report collectively as the “Covered Products,” consist of professional and engineered products, software, and services in our Intelligent Operating Solutions, Precision Technologies, and Advanced Healthcare Solutions segments.

Reasonable Country of Origin Inquiry

The Company has conducted a reasonable country of origin inquiry, or RCOI, regarding the Conflict Minerals. This inquiry was reasonably designed to determine whether any of the Conflict Minerals originated in the Covered Countries and whether any of the Conflict Minerals may be from recycled or scrap sources.

The Company’s supply chain with respect to the Covered Products is complex, and there are many third parties in the supply chain between the ultimate manufacturer of the Covered Products and the original sources of Conflict Minerals. The Company does not purchase Conflict Minerals directly from mines, smelters or refiners. The Company must therefore rely on its suppliers to provide information regarding the origin of Conflict Minerals that are included in the Covered Products.

Moreover, the Company believes that the smelters and other refiners (“smelters”) of the Conflict Minerals are best situated to identify the sources of Conflict Minerals, and therefore has structured its RCOI to identify applicable smelters of Conflict Minerals in the Company’s supply chain. Due to the overlap between the supplier/smelter RCOI and supplier/smelter due diligence processes, the supplier/smelter RCOI processes are summarized in the due diligence section of this Report.

Based on the RCOI, the Company has reason to believe that certain of its necessary Conflict Minerals may have originated in the Covered Countries and are not from recycled or scrap sources.

Due Diligence

The Company designed its due diligence process to conform with the Organization for Economic Cooperation and Development (OECD) guidance on supply chain due diligence.

Due diligence.
